

## Manual Testing :

1) logging into same account from 2 devices

↳ then deleting account? Fixed

2) 3 clients :  works ✓

3) deleting account mid-connection fine ✓

4) Using commands with the wrong following string

→ throw the right error /s ✓ /c ✓

5) show queued messages from users when logging in ✓

6) text wildcard → matching before \* ✓

7) texting deleted account : inform sender?

8) texting unconnected user ✓

9) prevent double logins ✓ [logged in]

10) error catching for logging in ✓

↳ check username ✓  
(unique + duplicate?)

↳ check for " " , " " ✓

11) error catching for deleting accounts: ✓

↳ queued messages?

↳ exit whole client? or allow log in?

↳ undelivered messages are not delivered ✓

12) → c1 logs in

→ c2 logs in

→ c1 send message to c2

→ c1 deletes account

→ c2 says it has unread messages but  
no way to access?

done ✓
